

CALM

A collection for peace & tranquility

Our lives have become so hyper-connected that many of us suffer from over-stimulation. As a result, we want to spend more time in calming and nurturing environments, away from the hustle and bustle of the 21st century. Our CALM collection invites you to relax for a few moments and return to life with new-found energy to co-create a more inclusive and kind environment for all of us to prosper.

Y2

Duality

According to the Yin & Yang interdependence philosophy, day cannot exist without night, and vice versa. Similarly, life cannot exist without death, and good cannot exist without evil. Interdependence is a crucial aspect of Yin Yang, as it emphasizes the importance of balance and harmony in all aspects of life.

In our interpretation of this concept, circular elements of dark and light represent the idea that these two forces are constantly in motion, flowing and changing in a never-ending cycle.

MOONRISE

Magical night

There is something mystical about the moon, especially when she is fully illuminated in the dark sky. This magical atmosphere invites us to go inwards and connect with ourselves on a soul level. Are we still on our path to personal freedom and happiness or do we need to adjust the course?

CUMULUS

Alto

Clouds are a fascinating spectacle to gaze at all day, especially around magic hour.

The layering and softness might as well remind us of the heavens perfect for a nursery or breastfeeding room.

We could even customise the pattern to add a message that resonates with your people.

GATHER

Togetherness

This is the energetic interpretation of how it feels when we gather together and exchange ideas and opinions with an open and curious mindset.

It's OK to have different points of view - only with an intention to understand each other, we will be able to live peacefully and find creative solutions that work best for everyone.

Freedom of expression and the celebration of individuality is our birthright.

FIBONACCI

Golden Ratio

Like a windmill, our interpretation of Fibonacci's spiral engages with the spectator playfully and optimistically. This shape can be found in nature, i.e. the shape of a flower, pine cone, or even seashells.

It is a phenomenon that when noticed, calms our nervous systems and lets us wonder about the miraculous organisation of our planet.

JOURNEY

Lighthearted

Life is a constant journey and the most enjoyable way forward is to roll!

Whether you're pushing a pram, riding a bike or operating a caravan.

Sometimes we take the road of least resistance and other times it's uphill all the way.

Keeping our journeys colourful and uplifting is the true destination, right?

This graphic is perfect for an EOT facility or long corridors.

FOLIAGE

Nature

A minimal interpretation of abstract foliage and playful lines that lift the mood.

This pattern was co-created with our friends at bokor for a medical centre.

bokor architecture + interiors is a boutique architectural and interior design practice with extensive experience in the commercial, retail, residential, and health sectors.

Here & Now

Our name is inspired by the zebra, the only animal to recognise it's friends by their unique patterns.

We create visual stories as part of our product range. They inject deeper meaning and emotional connections with people.

All our patterns are ready-to-specify on a variety of glass films, wall coverings, upholstery, handwoven rugs and artworks.

Please contact us for customisations and commissioning.
